Douglas, Vic. 3409

We are a third-generation beekeeping family with two young children with hives in the Stanley family since 1939. We are located in Douglas in Western Victoria and produce honey from the Wimmera & Grampians region. Our premium honey varieties include; Manuka, Red Gum, Blue Gum, Yellow Box, Yellow Gum and Stringy Bark.

Our 100% Raw Australian Manuka honey can be enjoyed in tea, breakfast oats, smoothies, or by the teaspoon. Stringy Bark honey is an ideal companion for baking, confirmed by chefs who have used our honey in desserts at the 150km Feast's Dinner Under The Stars since 2021.

While honey is an edible product, our Beetanicals journey began in 2015 for health and wellness, when our son Cooper's sensitive skin as a baby led us to create a soothing balm made from beeswax & manuka honey. This story continues as part of our dedication to bee-inspired wellness with our range of products available from our online store & incredible stockists. Our priority is to provide natural, safe, effective and transparent products for families just like ours and also to deliver a delicious spread for your toast each morning!

Great things can be achieved outside of our comfort zones. You should always back yourself, never doubt your own worth, be yourself and... always BEE KIND to yourself. You never know where it could lead you."

Tanya Stanley, Beetanicals
